

elcometer®

CONTRACTOR
ABRASIVE BLAST
MACHINES

"Every detail of an Elcometer blast machine has been engineered to be safe, last longer and work harder; dependability you can trust."

SAFE & RELIABLE

Rugged, reliable and easy to use, Elcometer blast machines & valves are supplied with a full 12 month warranty and are engineered & tested to be **incredibly efficient, durable and safe.**

Excellence Is Our Standard

Designed and manufactured at our production facility in Great Britain, Elcometer blast machines are UKCA and CE approved to both PED 2014/68EU and PE(s)R 2016.

Built to Last

Manufactured out of heavy duty 6mm (¼") steel with double weld seams and with a tough marine specification multi-coat anti-corrosion paint, Elcometer blast machines exceed UKCA, CE & PED Standards to maximise their lifespan.

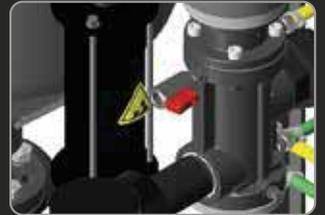

Putting You in Control

Industry standard remote control valves allow you to safely control the blast machine at the nozzle, whilst the exhaust manifold allows air to quickly depressurise the blast machine.

Emergency Shut Down

Every Elcometer blast machine is fitted with an easy to reach safety petcock as standard. In an emergency it will isolate the deadman's handle circuit and depressurise the blast machine quickly and safely.

Peace of Mind

Pressure relief valves must be incorporated into the system to meet global safety standards. Elcometer offer certified pressure relief valves which can be fitted to automatically discharge the compressed air in the blast machine upon reaching the release pressure.

The Elcometer Abrasive Blast Machine Range Comparison Summary

From small maintenance projects to large scale refurbishment contracts, from blasting small industrial parts to ballast tanks, or iron gates to bridges...

...whatever the scale of your project Elcometer blast equipment is engineered to last longer, work harder and perform better.

Using industry standard remote control valves, grit valves and 32mm (1¼") pipework, the Elcometer range of **CONTRACTOR** Abrasive Blast Machines are highly competitive and easy to maintain.

- Competitive and easy to use abrasive blast machines
- Available in a range of sizes from 40 to 100 litres to suit your application
- Industry standard parts for simple maintenance
- Heavy duty 6mm (¼") construction for long service life
- Elcometer engineered for reliability
- 12 month manufacturer's warranty

The **CONTRACTOR** Portable Abrasive Blast Machines are built to the same high quality as the Elcometer **PERFORMANCE** and **PERFORMANCE HP** blast machines.

Elcometer CONTRACTOR Portable Abrasive Blast Machines are cost effective, easy to use and Elcometer engineered for reliability.

UKCA & CE approved.

Fully tested and certified to PED 2014/68EU and PE(s)R 2016.

Maximum working pressure of 12bar (174psi).

Heavy Duty Construction

6mm (1/4") steel wall thickness, double weld seams & coated with a tough multi-coat paint for corrosion protection.

Reliable Performance

Standard bore 32mm (1 1/4") pipework throughout for reliable airflow performance.

Concave Dishes

Our high flow concave dish comes complete with a deflector plate for fast filling & operator safety.

Fast Flow Cone

45/90° cone to maximise abrasive flow rate.

Exhaust Manifolds

Industry standard exhaust manifolds allow air to exhaust through the silencer safely.

Moisture Separators

High performance moisture separator prevents water and oil from entering the blast pot.

Large Inspection Access

Elcometer's Contractor abrasive blast machines make inspection and servicing easy, thanks to the large doorway access that is wide enough to fit both arms.

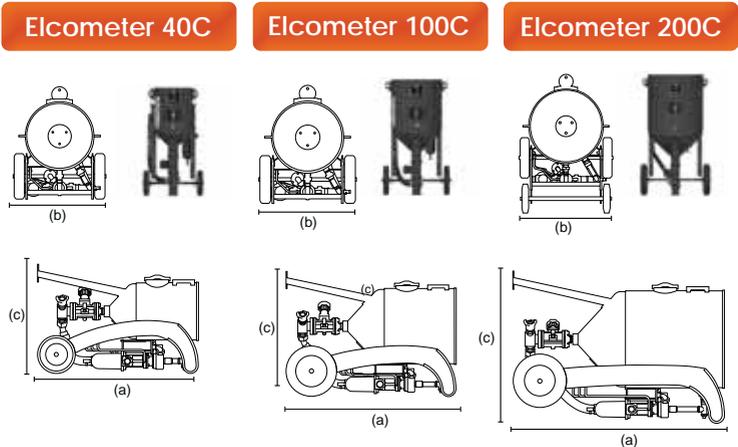

Waterproof Sieves & Lids

Optional sieves & lids are designed to fit over the top of the machine to prevent water ingress, keeping the media dry.

Available in a range of sizes from 40 up to 200 litres (1.41 - 7.06cu ft), to suit your application.

Not all Abrasive Blast Machines are created equal

Elcometer **Performance** Abrasive Blast Machines are engineered to **work harder, last longer and perform better**

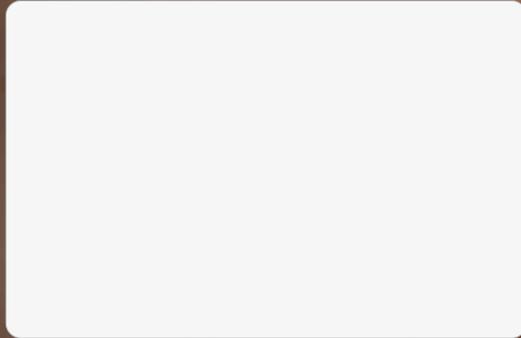

- High flow rate design with 12 or 15 bar (174 or 217psi) working pressure ensures minimal pressure loss for greater blasting efficiency over long hose lengths
- Precision media valves with fingertip adjustment allow you to use less abrasive to cover the same area
- Safe control & fast depressurisation using state-of-the-art Remote Control Valves
- Machines and valves are tough, reliable & built to last with a full 12 month warranty
- UKCA and CE approval to both PED 2014/68EU and PE(s)R 2016.
- Supported by a complete range of spare & replacement parts, accessories & personal protection equipment
